

Bonaire Durango Roof Top Cooler Leg Mounting Kit Instructions

Note: Leg Mounting Accessory Kit NOT INCLUDED with unit.

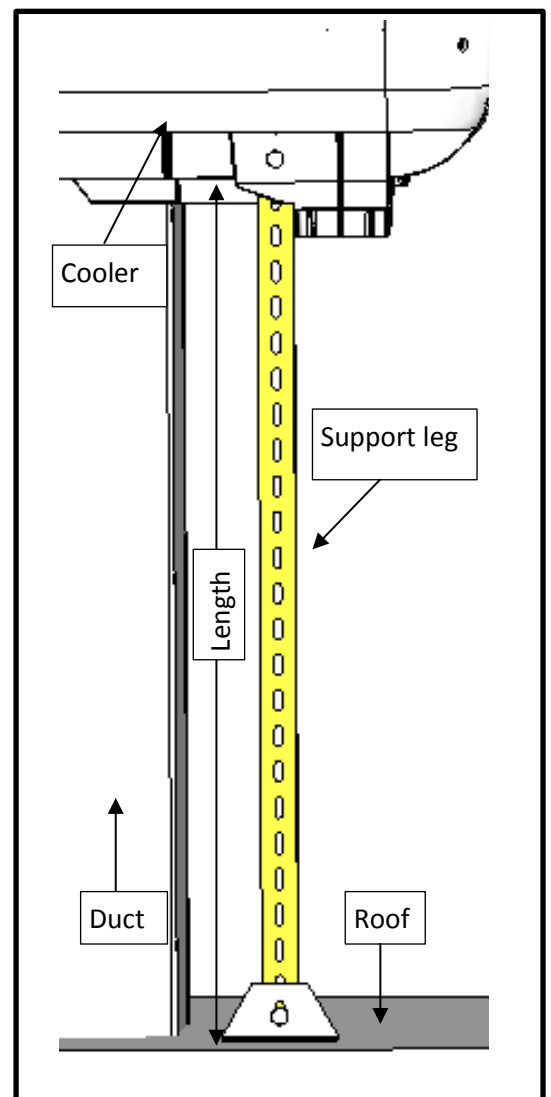

1. Loosely attach the feet to the ends of the legs using bolts & nuts. Position the feet to assemble 2 x right side and 2 x left side legs as shown in the image below.

2. Position the cooler on to the duct opening and level the cooler
3. Measure the required length for the legs. See image below.
 - a. Cut support legs to length if required.

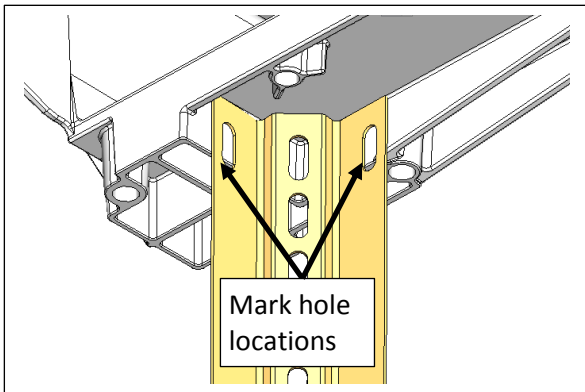

Rounded legs

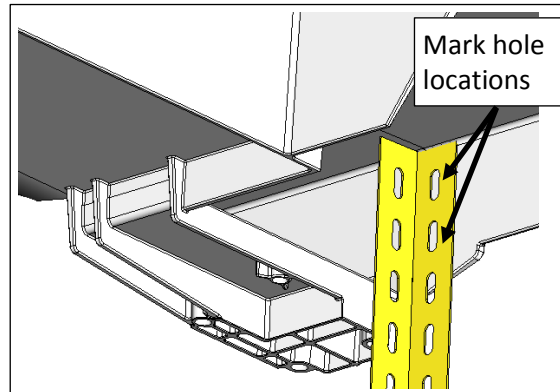

Square legs

NOTE: For pitched roof installations 2 x "Long" supports and 2 x "short" supports will be required.

4. Locate the support legs in position and mark position for the screws. Depending on the type of fastening bolt/screw a pilot hole may need to be drilled.
 - a. Secure the support legs to the cooler using a minimum of 2 fasteners.

Rounded legs

Square legs

5. Check the level of the cooler and adjust if required.
6. Locate all support legs in position and fasten the support legs to the cooler
7. Align the support leg feet with the roof pitch and tighten the bolts and nuts securing the feet.
8. Fasten the feet to the roof using appropriate fasteners, ensuring the cooler, legs and feet are securely fastened.
